

# 2021 Order Form

## Rutgers 250, Ramapo, and KC-146 Tomato Seeds

The *Rediscover the Jersey Tomato* project is bringing back tomatoes with the delicious tangy old time Jersey tomato flavor that New Jersey farmers grew from the 1930s – 70s. In 2016 we introduced the 'Rutgers 250' tomato and now offer four varieties, each with distinctive qualities, for home gardeners to reproduce that memorable taste.

*These tomato varieties were developed through non-transgenic (non-GMO) breeding.*

**Please allow up to three weeks turnaround time to receive your order.**

● **Rutgers 250 tomato** is the new result from crossing the same parent varieties as the original 'Rutgers' tomato that was released by Rutgers New Jersey Agricultural Experiment Station (NJAES) in 1934. 'Rutgers 250' was selected for high fruit quality and flavor and was named in honor of the University's 250th anniversary.

*Mid-season maturity. Firm, crack-resistant fruit; high flavor, uniform color. Semi-determinate plants; best if staked. 'Rutgers 250' was not bred specifically for disease resistance, but in trials has shown good resistance to bacterial spot and bacterial speck. Open-pollinated.*

● **Ramapo F1 Hybrid tomato** was developed at Rutgers NJAES and released in 1968. It was prized by gardeners for its great flavor, fruit quality, reliability, and productivity. While Ramapo seed was unavailable for many years, Rutgers NJAES continued receiving requests for this popular tomato and eventually reintroduced Ramapo F-1 seeds in 2008.

*Mid to late season; resistant to cracking and Verticillium and Fusarium wilt. Semi-determinate plants approximately 80 days to maturity. Medium - large sized fruit. Feedback from a gardener survey indicates that Ramapo tomato grows well in a variety of US regions.*

● **Moreton F1 Hybrid tomato** was Harris Seeds' first F-1 hybrid, released in 1953 and one of the first hybrids grown by Jersey tomato growers. This early maturing, tasty variety was off the market and reintroduced in a cooperative effort by Harris and Rutgers. Moreton makes a good earlier maturing garden companion to Rutgers 250, Ramapo and KC-146.

*Early season, resistant to Verticillium. Indeterminate plants mature in 70 days. Medium - large sized fruit. Treated seed. Favorite in extreme climates with short growing seasons. Grows well in containers.*

● **KC-146 tomato** (also known as Campbell's 146) was developed by Campbell's Soup Company as a processing tomato and released in 1956. This variety was wilt and crack-resistant and better flavored than other processing types. It was eventually replaced with newer varieties with a more disease resistance. Campbell's maintained the KC-146 stock as a flavor standard. We agree, this is one tasty tomato!

*Mid to late season; resistant to Fusarium wilt, semi-determinate plants; 78 days to maturity; medium-large sized fruit. Even though it is a processing variety, it has incredible flavor as a fresh tomato. Open-pollinated.*

*New for 2020!*

## Scarlet Sunrise Bicolor Grape Tomato

(Plant Variety Protection Certificate pending)

The Rutgers New Jersey Agricultural Experiment Station tomato breeding team that developed the 'Rutgers 250' tomato, has created a new and unique bicolor grape tomato. Developed by traditional (non-GMO) plant breeding methods, this cultivar has firm, crack-resistant red/yellow fruit. And, in tribute to New Jersey's legacy of tasty tomatoes, the breeding program's emphasis on flavor is depicted in this tomato, with an intense sweet flavor balanced by moderate acidity. The indeterminate plants are high yielding, with mid-late season fruit maturity. 'Scarlet Sunrise' is open-pollinated; 70 days to maturity.

Red and yellow crack-resistant fruit with sweet intense flavor. High yielding, indeterminate plants.

## Jersey Tomato Tee Shirt

**Jersey Tomato tee shirts** - You can't eat a tee shirt, but you can stir up some memories. Whether you ate your Jersey tomato with a few shakes of salt or in a "Jersey tomato sandwich" (white bread, mayo & a Jersey tomato), that tomato lives on in our memory.

100% cotton tagless tee. Available only in stonewashed green (on left in photo). Men's sizes: S, M, L, XL or XXL.

Back of tee: Rutgers NJAES logo and "Rediscover the Jersey Tomato"

All sales are final. For tee-shirts if you are unsure of fit,  
please refer to Hanes men's tee-shirt sizing.  
**Please allow up to three weeks turnaround time to receive your order.**
